

The Massachusetts Neuropsychological Society

Presents

Neuropsychological Services for Alternative Populations: Cross Cultural and Ecological Perspectives

Tuesday, May 6, 2008
7:30 PM - 9:00 PM

Please join us at 7:00 pm for refreshments

Speaker: Dr. Carmen Armengol

Carmen Armengol, Ph.D., is Associate Professor in the Department of Counseling and Applied Education Psychology at Northeastern University's Bouve College of Health Science. Dr. Armengol received her Ph.D. at Pennsylvania State University. Her research is primarily devoted to creating and developing norms for neuropsychological instruments for Spanish-speaking children and identifying early predictors of academic achievement. Other research interests include biculturalism and bilingualism and their impact on attention and other neuropsychological functions. She has also focused on neuropsychological rehabilitation of traumatic head injury and cerebral hypoxia. Dr. Armengol also provides staff consultation and clinical training for advanced doctoral students at Northeastern's Disability Resource Center.

Learning Goals:

1. Participants will be able to describe specific service needs of "alternative" populations
2. They will learn to utilize available neuropsychological assessment resources
3. They will be able to discuss available intervention resources

**Spaulding Rehabilitation Hospital, 125 Nashua Street, 8th Floor
Conference Room**
